

CPP versus PCIT Decision Tree: Child & Family Factors

This decision tree assumes the validity of caregiver report on standardized measures. If you have reason to believe that a caregiver was unable or unwilling to report accurately on standardized measures, please carefully review CPP/PCIT Decision Tree: Parent Factors for more information. Use of this decision tree is not intended to replace clinical judgment.

CPP versus PCIT Decision Tree: Parent Factors

Use of this decision tree is not intended to replace clinical judgment. Treatment decisions should be made within the context of all known factors about the child and family.
