Center

A PARTNER IN
NCTSN
The National Child
Traumatic Stress Network

OBJECTIVES

1. Describe the current project
2. Describe experiences of 1-5 year old children entering foster care in Sacramento County- their characteristics, caregivers, and living situations
3. Understand the effectiveness of PC-CARE for reducing behavior problems, increasing resilience, and improving placement stability

Rates of foster care entry

- In Sacramento County, children were entering foster care at a higher rate than children statewide (Webster et al., 2016)

Placement stability: an essential part of young children's mental health

- Young children in Sacramento County appeared to change placements more frequently (Webster et al., 2016)

Placement stability between January and June 2015

Project Goals:

- Provide trauma screener to all 1 - 5 year old children entering new foster homes
- Provide PC-CARE as a preventive intervention to those children and their foster caregivers for **6 weeks**
- Reduce child trauma-related symptoms
- Increase foster placement stability
- Refer to other services as needed

Who is eligible for treatment?

- Children aged 1-5 years old
- Entered a new foster placement in the previous 90 days
- Children in foster homes: County foster homes, FFA foster homes, kin caregivers

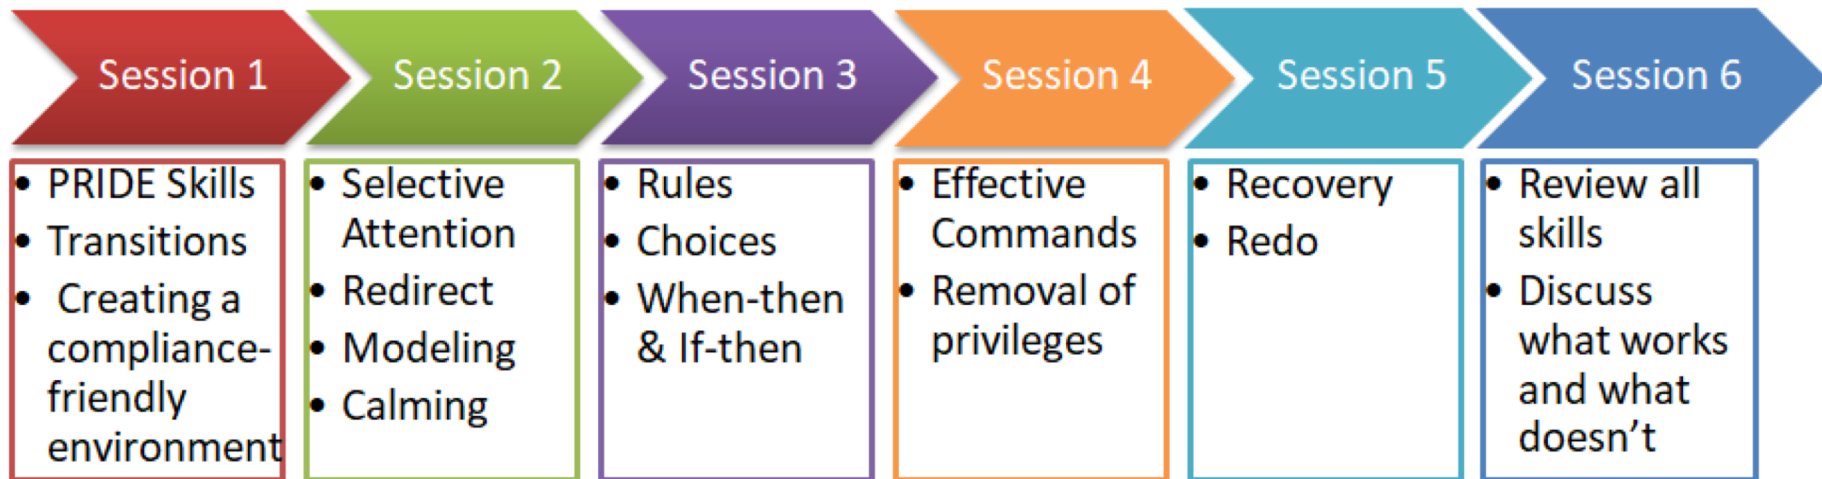

PC-CARE

UCDAVIS
CHILDREN'S HOSPITAL

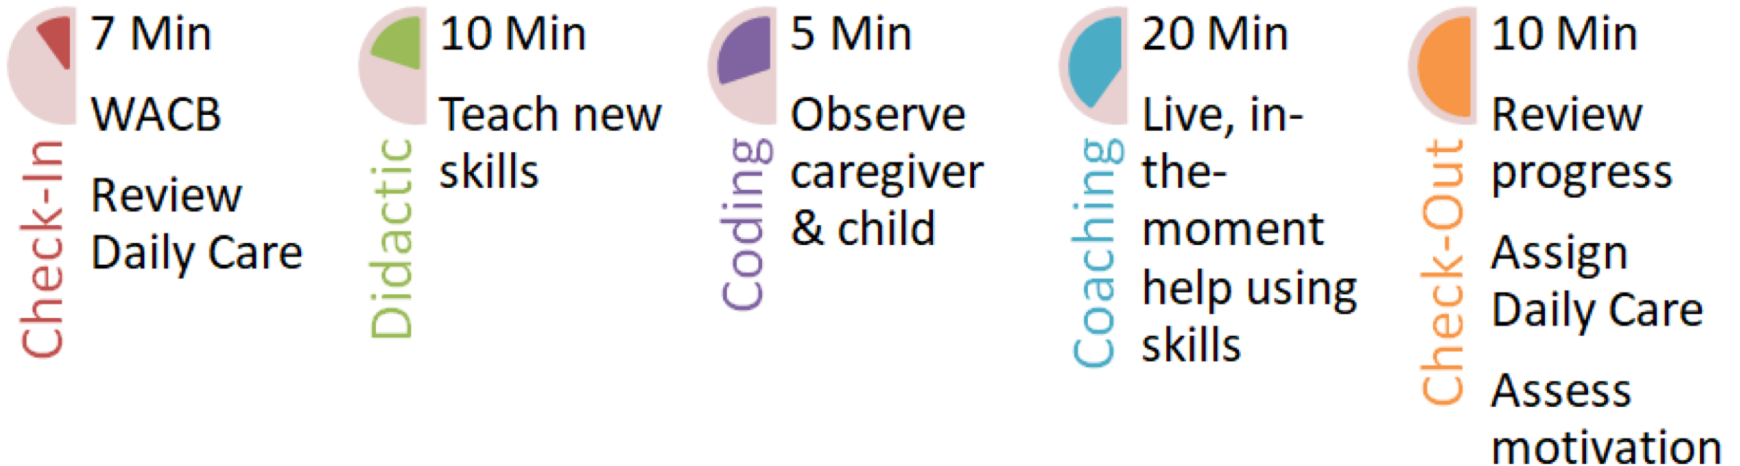

- 7 week intervention
 - (1 Assessment + 6 Sessions)
- Teach & coach parents and children
- PRIDE (positive parenting) skills
- Calming/self-regulation
- Behavior management skills

COURSE OF TREATMENT

TYPICAL PC-CARE SESSION

THE CHILD IN THE SYSTEM

How do children get to these resource parents?

- Call to hotline—> meets criteria for investigation—> assigned to Emergency Response Social Worker —> outcome calls for removal
- Child placed into protective custody—> child brought to CPSU for placement(Centralized Placement Support Unit).
 - 1) CPSU Intake Worker handles intake paperwork
 - 2) Child Worker (assigned for 30 days, collects information)
 - 3) Placement Worker (assigned to find placement)
 - 4) If case goes to court, a Court Services Social Worker is assigned (i.e., Juvenile Court Investigator) and has the case for a brief period of time, around a month, if there are no issues with continuances or trials.
 - 5) Permanency Social Worker is also assigned at this time, who handles all case management duties such as referral to services, visitation, and keeps the case as long as parental rights are not terminated.

What are the reasons for placement changes?

Emergency and temporary placements

A kinship home is found

No home was available for all siblings initially, but when one opens, they move kids to keep them together

Kinship home doesn't work out

Foster family seeking adoptable child and child does not go to TPR

Foster parents can't keep visit schedule

Child develops difficult behaviors

Child isn't a good fit for current home for many possible reasons

Foster family has major life change, e.g., birth of a new child, loss of job, moving

Increased or decreased medical needs

Birth parents cause too much drama, so child is moved.

THE CHILDREN

Who is getting referred?

- **209** eligible children referred to PC-CARE (so far)
- Average age = 3.1 years (SD= 1.4)
- 59% Male, 41% Female

Child ethnicity:

Who is getting referred?:

- How many do resource parents report having behavioral concerns at time of call? 53%
- How many have medical problems? 11%
- How many have developmental delays? 25%
- How many had previous mental health services? 11%
- Trauma history:
 - 55% Domestic violence
 - 89% Neglect
 - 63% Parent substance abuse
 - 29% Physical Abuse

THE CAREGIVERS

Are resource parents agreeing to participate?

- How many accepted services? 61% (N=127)
- How many refused services? 34% (N=71)
- Pending a response? 5% (N=11)

How many resource parents start PC-CARE out of those agreeing to participate?

- How many start services? 80% (N= 97)
- How many drop early? 26% (N= 32)
- How many have completed so far? 44% (N=53)

What do we know about the resource parents?

Non-Relative
Caregiver: 80%

Married or
Cohabiting: 74%

Occupational Status:
Full-time foster: 49%
Employed: 31%

Home Environment:
Biological Children in Home: 48%
Other Foster Children: 18%

How do resource parents feel about their foster kids?

Families have lots of routines and habits:

- 80% of resource parents identified 6-8 areas where they had “ways of doing things.”

Child behaves the way the resource parent would like in how many areas?

COMMITMENT:

- 89% of resource parents are committed to parenting these children until permanency is finalized.

Pre- Treatment Perceptions about Participating in PC-CARE

OUTCOMES!

Placement Stability

Placement at 1-month follow up

Placement Stability

6-month follow up

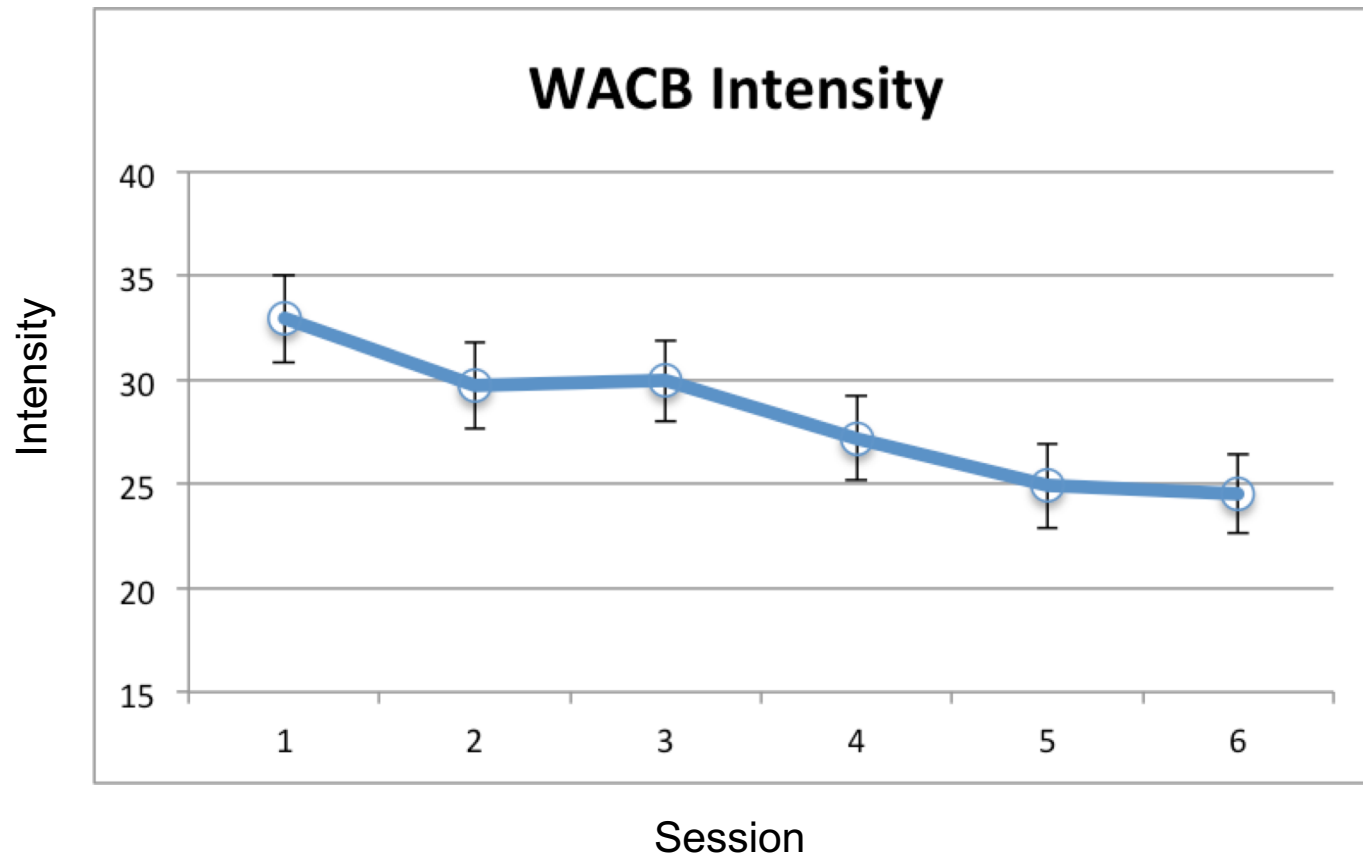

TRAUMA SYMPTOM CHANGE
